

Russell Dudek

AI Enablement & Operating Transformation Leader

Pittsburgh, Pennsylvania | 412.287.8640 | russelldudek@gmail.com | [linkedin.com/in/russelldudek](https://www.linkedin.com/in/russelldudek) | russelldudek.github.io/harris

Operator-technologist who turns emerging technology into adopted, measurable workflow mechanisms. Makes complex work visible, connects technical and business teams, and builds practical systems for intake, prioritization, governance, training, measurement, and iteration.

ROLE-ALIGNED CAPABILITIES

AI readiness & use-case discovery	Workflow redesign & adoption	Hands-on AI/automation patterns
Executive operating cadence	Governance & human authority	Cross-functional facilitation
Backlog & value prioritization	Training & champion systems	Measurement & iteration

CURRENT AND DIRECTLY RELEVANT EXPERIENCE

Vape-Jet | Director of Operations

2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth | Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks assessing value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, transportation systems, network analysis, and workflow design.

Amazon | Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.

Compunetics | Director of Operations and Engineering Management

2000-2013

- Progressed through R&D; program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with DoD, CERN, Intel, and AMD.

Cardinal Building Products | Regional Director

2021-2023

- Built the company's first remote regional operation and modernized distributed customer, CRM, fulfillment, logistics, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

COMPLEMENTARY OPERATING DEPTH

ZeusVu | Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

ADDITIONAL LEADERSHIP

Enviro Social Capital

Chairman of the Board | 2014-2017

Co-founded a public-private impact initiative focused on sustainable infrastructure and green finance; helped shape a \$200 million Social Impact Bond feasibility concept.

IEEE

CMPT and EDS Pittsburgh Chapter Chair | 2012-2016

Led regional programming connecting industry, academia, STEM outreach, electronics, manufacturing, and emerging technology.

SELECTED AI ENABLEMENT MECHANISMS

READINESS

Qualify before building

Value, feasibility, data readiness, governance, adoption burden, and owner strength.

DEMAND

Make the queue explicit

Named workflow owners, visible friction, baselines, priorities, and next decisions.

AUTHORITY

Keep judgment visible

Human sign-off, exception paths, escalation, and decision records inside the workflow.

ADOPTION

Teach through real tasks

Standard work, role-specific training, champions, office hours, and reinforced practice.

MEASUREMENT

Prove changed work

Cycle time, quality, rework, exceptions, retained use, and outcome-based iteration.

TRANSLATION

Bridge operating seams

Connect business owners, technical teams, governance actors, users, and customers.

EDUCATION, CREDENTIALS & TOOLKIT

University of Pittsburgh | Bachelor of Science - Academic grounding includes materials science, physical chemistry, and biology-related studies.

Credentials: IBM Enterprise Design Thinking Practitioner | Six Sigma Certification | OSHA 10

Technical toolkit: Agentic AI | LLM workflows | RAG | Human-in-the-loop design | Python | SQL | JavaScript | TensorFlow | Tableau | ERP/Odoo | Jira | Confluence | HubSpot | Slack | GIS and mapping

SERVICELINK TRANSFER THESIS

The consistent through-line is not hierarchy; it is mechanism-building: observe the workflow, make the problem visible, shape the intervention, connect technical and business people, teach the new standard, instrument the result, and iterate. That is the operating core of a hands-on AI Enablement Lead.
